EDUCATION

BS in Computer Science
Lebanese International University (LIU) | 2022 - 2025
GPA: 3.93

EXPERIENCE

Software Developer
Logos Interprise and Solutions | July 2025 – Present

- Oracle APEX Developer building scalable enterprise applications used by companies.
- Developed secure and scalable systems using Oracle APEX, PL/SQL, JavaScript, HTML, and CSS.
- Built a application that fully relies on apis
- Designed and optimized complex SQL queries, PL/SQL processes, stored procedures, and reusable database functions to support high-performance enterprise applications.
- Built dynamic reports with dynamic tables and dynamic columns.
- Rendered dynamic data using HTML, CSS, JavaScript, and PL/SQL.
- Developed secure payment pages and implemented security best practices.
- Implemented authentication and access control.

TECHNICAL SKILLS

Programming Languages: Java, Python, PL/SQL
Web Development: HTML, CSS, JavaScript, PHP, AJAX, Oracle APEX
Database Management: Oracle, SQL, PL/SQL, MySQL
Artificial Intelligence: Ollama, Local AI Integration, n8n, LLM Integration
Tools: Oracle APEX, ORDS, MCP Server, Git

PROJECTS

Ticketing Application

- Developed a ticketing application fully reliant on APIs for seamless integration and real-time data exchange.
- Designed and implemented a complex ERP-style architecture with advanced workflow management to handle multi-step business processes and approvals.

MCP Server with Database Integration

- Developed MCP Server using Python, Node.js, and Qwen MCP.
- Connected AI chat system to Oracle database.

AI CV Parser with Oracle APEX and Ollama

- Built AI system that receives CV from Oracle APEX frontend.
- Sent CV to local AI using Ollama.
- Returned structured JSON and saved to Oracle APEX.
